

File Input and Output (continued)

October 24, 2022

Administrative notes

1. Health Status
2. Homework 5 due tonight
3. Project 1 released - see github. Due date: Monday, November 7, by midnight
 - a. You have two weeks to do this; please do not wait until the last few days. It is a significant increase in the amount and difficulty of code you'll have to write
 - b. Get the skeleton files quickly and start looking at them
 - c. We'll talk about this each lecture

Health Status

1. After noticing symptoms last Monday evening, October 17, I tested positive for COVID-19 on Tuesday, October 18
2. Following CDC guidelines, I isolated for five days. Which was why last Wednesday's lecture was virtual.
3. With no further symptoms, I was released from isolation on Saturday, October 22. (Yes, in time to attend my daughter's wedding. :-)
4. Per CDC guidance, I must now wear a mask for 5 more days. Thus I will be masked in class both today and Wednesday. Presuming no symptoms, I can stop wearing the mask after Wednesday

Now to new material

We will practice writing code to import both text and .csv files.
